

# SCOPIA Connector for Microsoft Office Communications Server 2007

*RADVISION delivers advanced conferencing capability to Microsoft's unified communications platform*

RADVISION is extending its support of the Microsoft unified communications product line with the new SCOPIA Microsoft Office Communications Server (OCS) 2007 Connector. The SCOPIA OCS 2007 Connector enhances the Microsoft solution providing the capability for Office Communicator users to participate in conferences with standards-based video conferencing systems and devices. The SCOPIA Connector is a simple to use, highly flexible tool allowing OCS 2007 users to join a meeting hosted on the SCOPIA Conferencing Platform. SCOPIA Conferencing Platform's media processing capabilities allow mixed conferences of High Definition (HD) video systems, standard definition systems, and video from desktops in the same call without requiring all participants to downgrade to their common capabilities. Each user participates in the conference at the highest quality available to them. SCOPIA offers these capabilities with pricing and capacity optimized for each application.

## SCOPIA Features & Benefits

- *Provides a simple method for Office Communicator users to join SCOPIA hosted multi-party meetings*
- *Adds connectivity to H.323, SIP, ISDN, and 3G video conferencing systems providing support for existing and future conferencing investments*
- *Supports HD (High Definition) video providing interoperability to the latest video conferencing room systems available*
- *Mix HD and standard room systems and desktops in the same call without all participants downgrading to their common capabilities*
- *A highly collaborative video experience where through Continuous Presence, multiple participants can be seen simultaneously*
- *Efficient bandwidth utilization where the connection rate remains constant regardless of the number of participants viewed*
- *Conference moderation allowing Office Communicator users to invite, disconnect, and mute participants along with controlling other important aspects of the meeting*

### About RADVISION

RADVISION (NASDAQ: RVSN) is the industry's leading provider of market-proven products and technologies for unified visual communications over IP and 3G networks. With its complete set of standards-based video networking infrastructure and developer toolkits for voice, video, data and wireless communications, RADVISION is driving the unified communications evolution by combining the power of video, voice, data and wireless - for high definition video conferencing systems, innovative converged mobile services, and highly scalable video-enabled desktop platforms on IP, 3G and emerging next-generation IMS networks.
